# Solix Big Data Suite - Standard Edition

Solix Virtual Printer and File Share Archiving

The Solix Big Data Suite is an extensive ILM framework to create a unified repository to capture all enterprise data and optimally organize it for analytics tools offered through the Solix App Store.

The Solix Big Data Suite harnesses the capabilities of Hadoop to create a comprehensive and efficient platform that creates unified and cost-effective ILM and BI infrastructures for all data, requiring smaller teams with fewer IT skills, while allowing quicker rollouts and faster results.

Solix also supports on-premise and cloud-based deployment on a variety of Hadoop distributions.

KEY FEATURES OF SOLIX BIG DATA SUITE STANDARD EDITION

File Share Archiving

Solix Big Data Suite provides the ability to archive files from network file shares into Apache Hadoop. The Solix Big Data Suite Standard Edition supports the following types of file shares: NAS devices (CIFS/NFS), Windows Shares, Unix Shares.

Key features:

- Consolidate content from file shares into central repository.
- Archive files based on business rules like file types, last-access dates, file-owner, file-size, etc.
- Automated/scheduled archiving.
- Retention Management, Legal Hold and eDiscovery archive.

Solix Virtual Printer

The Solix Virtual Printer provides the ability to capture print stream into Apache Hadoop in a compliant and searchable PDF/A format. Applications can print data directly to the Solix Virtual Printer to preserve documents and reports, and access them through a user friendly search interface.

Benefits of the Solix Big Data Suite Standard Edition

- Unified archive for storage optimization
- Built-in full text search and reporting capabilities
- Integrated ILM- Retention Management and Legal Hold
- Preserve data in an immutable read-only format

KEY FEATURES:

- Print reports from native applications to build a **Reports Catalog.**
- Retain documents in their original format .
- Automatically meta-tag and categorize the reports.
- Reduce carbon footprint.

ABOUT SOLIX TECHNOLOGIES, INC.

Solix Technologies, Inc., the leading provider of Enterprise Data Management (EDM) solutions, is transforming information management with the first enterprise archiving and data lake application suite for big data: The Solix Big Data Suite. Solix is helping organizations learn more from their data with enterprise analytics and achieve Information Lifecycle Management (ILM) goals. The Solix Enterprise Data Management Suite (Solix EDMS) and Solix Enterprise Standard Edition (SE) enable organizations to improve application performance, meet compliance objectives, and reduce the cost of data management across the enterprise. Solix Technologies, Inc. is headquartered in Santa Clara, California and operates worldwide through an established network of value added resellers (VARs) and systems integrators.
