

PRODUCT DATASHEET

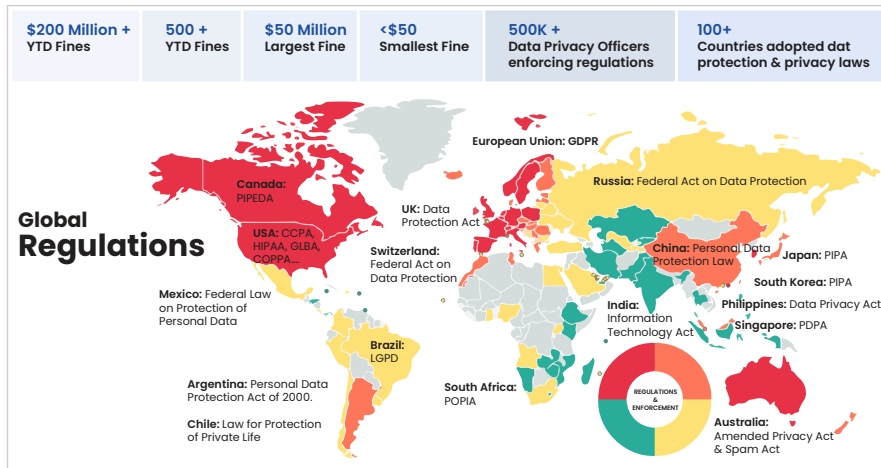

Streamline & Strengthen Privacy Compliance with SOLIXCloud CDPS

In today's digital age, enterprises are handling vast amounts of personal data, making compliance with global and industry privacy regulations not just a legal necessity but also a critical aspect of customer trust and business reputation.

Privacy regulations such as the GDPR in the EU and the CCPA in the US and industry-specific regulations such as NYS DFS for Finance, HIPAA for Healthcare, and many others mandate stringent data management practices to protect consumer data across the organization.

Non-compliance with these regulations can result in steep regulatory fines, legal hassles, and loss of customer trust and reputation.

HIGHLIGHTS

- ➔ Connect to 100s of data sources
- ➔ Support for structured, semi-structured, and unstructured data
- ➔ Efficient discovery of data across the enterprise data landscape
- ➔ Streamlined and integrated workflows from DSAR to compliance enforcement
- ➔ Comprehensive compliance capabilities
- ➔ Reporting and audit capabilities
- ➔ Highly scalable and performant
- ➔ Multi-Cloud solution

Introducing SOLIXCloud Consumer Data Privacy Solution (CDPS)

In this highly regulated era, SOLIXCloud Consumer Data Privacy Solution (CDPS) stands out as a vital tool to meet the demands of global and local privacy regulations.

Part of the SOLIXCloud Enterprise Security and Compliance Suite, the solution's comprehensive capabilities allow organizations to confidently discover sensitive data across all enterprise sources and enforce necessary measures to comply with industry and privacy regulations.

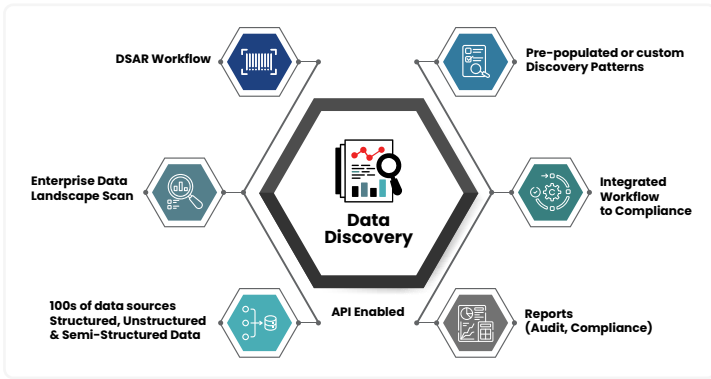

Datasheet:

KEY FEATURES

Sensitive Data Discovery

Log a DSAR and trigger discovery of sensitive information across the enterprise data landscape with connectors to over 100+ data sources, numerous configurable discovery patterns, and auto-discovery capabilities. Solix CDPS can scan the full spectrum of structured, semi-structured, and unstructured enterprise data across on-prem and multi-cloud environments at scale.

Enforce Regulatory Compliance

Data privacy compliance can be distilled into eight key principles common to various regulations. These principles encompass rights such as data erasure, the right to be forgotten, and the right to be informed, among others.

SOLIXCloud CDPS helps enterprises address these fundamental data privacy mandates through its discovery, data minimization, data masking, retention management, and reporting framework. This framework empowers organizations to streamline actions, from logging a DSAR request to achieving compliance goals.

Comprehensive Reporting and Audit: With detailed compliance reporting and audit trails, businesses can not only ensure compliance and audit readiness but also monitor and review their data security and compliance endeavors for continuous improvement.

Multi-Cloud Solution: SOLIXCloud CDPS supports flexible deployment options, including multi-cloud and SaaS, ensuring comprehensive and seamless integration into existing IT infrastructures and strategies.
